Investment strategy

Fund IV makes control and significant-minority investments in upper mid-market companies with enterprise values between $750 million and $4 billion. The fund focuses on three sectors where the firm has built deep operating expertise: Healthcare Services, Energy Transition & Infrastructure Services, and Vertical Software. We seek businesses with recurring revenue, defensible market positions and clear paths to margin expansion through operational improvement.

Our value-creation approach is led by the Halvoran Operating Group, a team of 14 former operators who work alongside management on pricing, procurement, digital transformation and talent. Every investment has a 100-day plan agreed with management before closing.
